BHRT Considerations

BHRT Dosage Form:

Would you prefer your treatment using a Prescription filled using a:

- Sub-dermal Pellet Administered once every 3-4 Months (Women) or 4-6 Months (Men)
- Topical gel applied once daily to inner arms or Thighs.
- Sublingual tablets dissolved under the tongue twice daily.

Baseline hormone levels must be checked. This can be achieved by testing blood within the Thrive Health and Wellness clinic location or at a LabCorp or Quest Diagnostics lab center. We test for the following hormones:

Men

- a. PSA
- b. Estradiol (E2)
- c. Testosterone (Free & Total)
- d. DHT
- e. DHEA (Sulfate)
- f. Vitamin D3 (25 Hydroxy)
- g. Thyroid: TSH, T3, and T4
- h. Optional: Reverse T3 (practitioner discretion)

If you have recently (within 1-2 months) had a blood hormone test (including all of the above items), please bring them along with your questionnaire to your scheduled consultation within the clinic at Thrive.

Where to go from here:

- I would like a consultation and recommendation from a Thrive Health and Wellness, LLC Practitioner.
 - ✓ Please Call Thrive Health and Wellness at (303) 790-8446 to schedule a consultation.
- I will bring this completed questionnaire to my appointment.
- I will contact my practitioner about further lab testing.

Waiver

I hereby release Thrive Health and Wellness, LLC, all its employees, associates and pharmacists from any and all liability whatsoever associated with or connected with my Biologically Identical Hormone Replacement Therapy (BHRT), consultation and/or use of BHRT. I acknowledge that I am legally responsible for and aware of the potential side-effects associated with BHRT. I understand that no doctor, practitioner, nurse, pharmacist, or administrative personnel can guarantee that BHRT will provide the results I seek. I am participating in this program by my own choice, and assume all responsibility for my use of BHRT.

I fully understand that it is my responsibility to have an annual physical examination along with appropriate laboratory testing. I am currently under the medical supervision of a primary care physician. I have been advised in this hormone self-assessment about the increased risks of heart disease, myocardial infarction, stroke, and breast cancer possibly associated with the use of BHRT. I have answered truthfully all of the questions on this questionnaire.

Privacy Agreement

Starting April 14, 2003, healthcare providers must comply with a new set of federal regulations. The regulations are part of the Health Insurance Portability and Accountability Act of 1996 ("HIPAA"), which addresses your rights to privacy and handling of Protected Health Information ("PHI").

Respect for your privacy is a top priority at Thrive Health and Wellness, LLC. Concern for your privacy rights goes hand in hand with our focus on maintaining and improving your health. One of the regulations requires that all of our patients receive our Notice of Privacy Practices at the time of, or prior to, our providing healthcare services. We are also required to ask each patient to sign an acknowledgment indicating receipt of this notice.

In an effort to ensure that there will not be a delay in your first treatment from Thrive Health and Wellness, LLC, and that you are provided with prompt service, we ask that you read and sign the Notice of Privacy Practices Acknowledgment form at the bottom of the page and return to us.

For Privacy Agreement Questions, please contact the clinic at: Thrive Health and Wellness, LLC

Male Testosterone and/or BHRT Pellet Insertion Consent Form

Name: _____ Today's Date: _____
(Last) (First) (Middle)

Bio-identical hormone pellets are concentrated hormones, biologically identical to the hormones you make in your own body prior to Andropause. Estrogen and testosterone were made in your testies and adrenal gland prior to Andropause. Bio-identical hormones have the same effects on your body as your own testosterone did when you were younger.

Bio-identical hormone pellets are made from yam and are FDA monitored but not approved for male hormonal replacement. The pellet method of hormone replacement has been used in Europe and Canada for many years and by select clinics in the United States. You will have similar risks as you had prior to andropause, from the effects of testosterone and androgens, given as pellets.

CONSENT FOR TREATMENT: I consent to the insertion of testosterone and/or BHRT pellets sub-dermally. I have been informed that I may experience any of the complications to this procedure as described below. These side effects are similar to those related to traditional testosterone and/or BHRT replacement. **Surgical risks are the same as for any minor medical procedure.**

Side effects may include: Bleeding, bruising, swelling, infection and pain; extrusion of pellets; hyper sexuality (overactive libido); lack of effect (from lack of absorption); increase in hair growth on the face. Testosterone therapy may increase one's hemoglobin and hematocrit, or thicken one's blood. This problem can be diagnosed with a blood test. Thus, a complete blood count (Hemoglobin and Hematocrit) should be done at least annually. This condition can be reversed simply by donating blood periodically.

BENEFITS OF TESTOSTERONE PELLETS INCLUDE: Increased libido, energy, and sense of well-being. Increased muscle mass and strength and stamina. Decreased frequency and severity of migraine headaches. Decrease in mood swings, anxiety and irritability. Decreased body fat/weight. Decrease in risk or severity of diabetes. Decreased risk of heart disease. Decreased risk of Alzheimer's and dementia. Increased Muscle tone.

I agree to immediately report to my practitioner's office any adverse reaction or problems that might be related to my therapy. Potential complications have been explained to me and I agree that I have received information regarding those risks, potential complications and benefits, and the nature of bio-identical and other treatments and have had all my questions answered. Furthermore, I have not been promised or guaranteed any specific benefits from the administration of bio-identical therapy. I accept these risks and benefits and I consent to the insertion of hormone pellets under my skin. This consent is ongoing for this and all future insertions. I understand that payment is due in full at the time of service. I also understand that it is my responsibility to submit a claim to my insurance company for any possible reimbursement. I have been advised that most insurance companies do not consider pellet therapy to be a covered benefit and my insurance company may not reimburse me, depending on my coverage. I acknowledge that my provider has no contracts with any insurance company and is not contractually obligated to pre-certify treatment with my insurance company or answer letters of appeal.

Hormone Replacement Fee Acknowledgment

Preventative medicine and bio-identical hormone replacement is a unique practice and is considered a form of alternative medicine. Even though the physicians and nurses are board certified as Medical Doctors and RN's or NP's, insurance does not recognize it as necessary medicine BUT is considered like plastic surgery (aesthetic medicine) and therefore is not covered by health insurance in most cases.

This practice is not associated with any insurance companies, which means they are not obligated to pay for our services (blood work, consultations, insertions or pellets). We require payment at time of service. We WILL NOT, communicate in any way with insurance companies.

The form and receipt are your responsibility and serve as evidence of your treatment. We will not call, write, pre-certify, or make any contact with your insurance company. Any follow up letters from your insurance to us will be disregarded. If we receive a check from your insurance company, we will not cash it, but instead return it to the sender. Likewise, we will not mail it to you.

For patients who have access to a Health Savings Account, you may pay for your treatment with that credit or debit card. This is the best idea for those patients who have an HAS/FSA as an option in their medical coverage.

New Patient Consult Fee \$125.00 (may be waived)

Blood Hormone Panel Testing \$49* to \$149* ea.

Male Hormone Pellet Insertion Fee (includes testosterone pellets^)..... \$799^

We accept the following forms of payment:

Master Card, Visa, Discover, American Express, Personal Checks and Cash.

****We also offer interest-Free in-house Payment Plans****
